

Controllers | E-Director

Graphical User Interface

Architectural Layout

Features & Benefits

- Smart but easy to use requiring minimal training.
- Dynamic displays, security control and full feature configuration available.
- Simple to use graphical reporting
- WAN/LAN direct connection
- Multi-lift system monitoring available.

Product

E-Director offers a visual view of our Ethos control systems, from simplex to full group and is popular with building managers, lift consultants and lift engineer.

E-Director is simple but smart providing standard and configurable lift management reports for analysis, engineers toolkit allowing easy lift configuration via laptop or PC and easy setup of all security features.

E-Director is future proof allowing new lifts to be added to the system at any time.
