

# FEEL THE POWER!

# ethos TWO

Maxi MRL

## MRL Lift Control System

**Ethos 2** has been designed to put a smile on your face with its powerful lift control technology at your fingertips.

The large full-colour touch-screen provides simple intuitive diagnostics, commissioning and configuration to make control quicker and easier.

### THE BENEFITS OF ETHOS 2

- A simple, intuitive colour touch-screen with symbols that provide clear indication of the lift's current status.
- Functions and features at your fingertips to drive the lift and check its performance.
- Checks the ride performance in real-time which helps the engineer spot any issues before the passenger does.
- Shaft self-learning for quicker installations.
- Organises fault-finding by filtering and searching options quickly to help get to the core of a problem.
- No more flicking through manuals, everything is digitally displayed.
- EN-81 20 ready

# MRL Lift Control System

TVC have the MRL (motor roomless lifts) to suit your application.

We understand that size matters.

In the case of MRLs, the physical constraints of the building and available room to locate the controller are key considerations when selecting the right MRL for the job.

With top-quality Ethos Two control as standard, TVC offer:

- Hybrid MRL: Suitable where MRL features are required but the controller is located in a dedicated room or cupboard.
- Maxi: Where there is sufficient room for all the controller components to be housed in a landing mounted controller. Size 500mm (w) x 300mm (d) x 2200 mm (h).
- 
- Midi: Size limitations dictate that some components such as the inverter need to be located in the lift shaft. Size 500mm (w) x 200mm (d) x 2200 mm (h).
- Mini: Our slimmest controller at only 160mm (w) x 100mm (d) x 2200mm (h) and although major components are in the lift shaft, we offer full MMI access to the processor and inverter along with passenger release features. Doors have a 3 point locking system.
- All controllers are available with left or right hand door hinges.
- A backplate only option is available where the controller is to be fitted into an existing cabinet.
