GSM Backup Device

The GSM Backup Device acts as backup to any analogue telephone line. In the event of a telephone line failure the GSM backup device will activate and initiate a text alert to inform you of the telephone line failure.

This will ensure that your lift autodialler has full cover, working 24/7 356 days offering peace of mind for the lift owner and works with any type of autodialler.

This quick to install solution can be loaded with a SIM card ready to go.

TVC supplied sim, no need for top ups and no monthly billing, everything is included within the contract. T&C's apply.
