

Dual GSM Device

making communication easier

Features & Benefits

- Full cover for your lift autodialler & Monitoring System 24/7, 356 days.
- Only need one sim card saving money.
- Easy installation.
- Optional 3 year sim contract; inclusive of calls.

Dual GSM Device

A Dual GSM Device is installed within this Ethos Two control panel. This device has been installed to allow the emFONE autodialler and the integral EMU Monitoring Unit to share one sim card.

This will ensure that your lift autodialler and monitoring unit has full cover, working 24/7 356 days offering peace of mind for the lift owner.

This quick to install solution can be loaded with a SIM card ready to go.

TVC supplied sim, no need for top ups, no monthly billing and no call charges, everything is included within the contract.
