

Fireman's Intercom Unit

for use with emFONE Autodialler

Features & Benefits

- Comes in a flush or surface mount fixture
- Includes fire fighting intercom
- Fire control switch
- Prewired
- Stainless steel engraved fixture
- Easy to adapt into an existing emFONE EM-181 system
- Only a 4 wire to connect to nearest available speaker (usually the pit unit)

Firemans Intercom Unit

The emFONE Fireman's Intercom Unit provides direct voice communication to the lift car or motor room should the fire control be activated. It allows the personnel using the emFONE fire fighting intercom to speak directly to a trapped passenger or personnel in the lift motor room in the event of a passenger trapping or fire fighting situation.
