

HW03 Handwind Unit

Digital Handwinding Position Display

Features & Benefits

- Audible floor level buzzer
- Battery backup via Ethos Two
- Easily programmable via Ethos Two MMI screen
- Bright LED for low-light conditions

HW03 Handwind Unit

The HW03 Handwind unit is a low-cost, high-performance digital handwinding position display for use with the Ethos controller for displaying lift floor level for handwinding purposes.

Simple configuration and programming via the Ethos Two MMI screen

Featuring a low-energy, high-intensity OLED display, floor position, door zone and status display messages are clearly presented.

When the lift is hand wound into floor level, the HW03 will sound a buzzer and flash the floor position. Clear, full text will indicate In Door Zone.
